E-COMMERCE CONSULTANT

sigma

E-COMMERCE CONSULTATNT

The right consultant for you

We believe in a better tomorrow at Sigma Unified Commerce. That tomorrow starts with the eyes seeing things differently and with those who get things done. We know what it takes to build a successful e-commerce business and that in an industry of constant change, always to be one step ahead. At Sigma Unified Commerce we understand that e-commerce isn't a just a technical system, its's an eco-system. Where all areas of your e-com business needs to pe properly optimized for your business to be successful.

One big challenge for e-com businesses today is to find the right competence. Many who works with e-commerce has a background from either tech, marketing, business or logictics, but very few has been working with all areas. Everone can't be the expert on everything. This means that you either have to recruit expensive senior persons that should be able to manage different roles, or train junior staff. Either way, this takes both time and money. By taking in consultants instead, will help you to continue to focus on your main goals and grow your business.

Areas of expterise:

Our e-commerce consultants are senior specialists where many has previously been working at some of the world's most successful e-commerce businesses but felt that they could make more use of their competence as consultants. Others has been with us at Unified Commerce for years where they have managed e-commerce accounts from start to end, setting up new businesses for our customers as project managers, developers and business analysts. We know e-commerce and we are looking forward to helping you grow your business. Among our consultants we have a broad spectrum of all areas in e-commerce, Business Development, Marketing, System Development and logistics. See last page for exact knowledge.

How much does it cost?

The most common asked question we get is if it's expensive to work with consultants? But I would like to turn this question around. How much would it cost you not to bring in extra people or chose not to move forward with that project due to the lack of staff? E-commerce is an industry of constant change and to be able to develop your site can be make it or break it. If you have high and low's in sale due to different sales periods, it's even more important. Maybe you don't need that extra pair of hands the full year, but would love some extra help during Black Friday? We got you covered!

Depending on what type of e-commerce specialist you need and their level of expertise, the price may differ. But regardless of your challenge, we are sure we have the consultant for you. Contact us today for a full offer on your needs.

Why should I choose consultants from Sigma Unified Commerce?

At Sigma Unified Commerce we have improved web services for over 30 years and our consultants has been working with and at some of the world's most successful e-commerce companies.

" Sigma was a strong and innovative support for us when we together developed a new logistic flow for our returns. A flow that would simply the process for both us and our customers." - Johanna Jörgner | Head Of PMO, Nelly.com

With a strong track record from e-commerce, tech, marketing and international development we dare to say that we know what it takes to help you grow your business. Because if you are successful, so are we.

Make the question if you need to bring in a pair of extra hands a bit easier to answer. Work with a partner that are used to quickly adapt to your business and help you grow faster.
